

Berwick Educational Association

“Astronomy to Geology”

**A mini course on chemistry by Dr David Smith
Saturdays 21st and 28th April 2018, 10am -12noon,
Berwick Voluntary Centre, Tweed St, Berwick**

Ever since Galileo Galilei ruffled the feathers of the Catholic Church astronomy has been wildly popular. Similarly geology, the study of the rocks beneath our feet, is of endless fascination. The A-word connection between the two is not Astrology but Atoms. Learn about diamonds, iron and gold and my favourite element, sulphur. Then there’s the most magical mineral in the cosmos - a veritable Michelangelo: ice.

The cost of the two lectures is £12 including refreshments. All are welcome, and no previous knowledge is assumed.
